

## Join the solar energy

Check the savings offered according to the panels installed at the address .

## Benefits of solar energy

The photovoltaic solar energy service offers a complete solution, adapted to your consumption and optimizing your profitability and savings, so that you can benefit from the energy that you pour into the network.

### Saving

Receive financial compensation for the surpluses discharged into the network.

### Custom installation

Installation of the panels in your home financed in comfortable installments.

### 100% Green Power

Consume clean energy with your solar panels helping the environment.

## Guarantees

### 2-year warranty

In the installation and labor

### 10-year warranty

About the installed solar panels

### Production guarantee

Of 80% of its power in 25 years

## Your solar equipment

At Lumisa we have the best materials for your photovoltaic installation, with manufacturers' guarantees and competitive prices.

Our invertors

### Huawei SUN2000L inverter

The Huawei SUN2000L inverter has active protection against current arcs, higher performance with up to 30% more energy.

Our solar panels

### TrinaSolar TallMax 450W Module

The TrinaSolar TallMax 450W module is one of the most reliable in the sector, it integrates several technologies with a maximum power of up to 450 W.

[Technical sheet](#)

## The process in detail

### Formalization of the budget

- Commercial visit to the installation
- Presentation of the technical study
- Technical commercial visit
- Presentation of the budget
- Budget signature

### Budget signature

- Execution of the installation
- Commissioning of the installation
- Monitoring and remote control of production
- Legalization of the installation
- IBI Bonus Processing

### Completion of installation

- Maintenance of the installation
- Delivery of final documentation
- Compensation of surpluses on your electricity bill

## Advice on subsidies and bonuses

At Lumisa we help you submit your application and process the Next Generation EU subsidy established in Royal Decree 477/2021, of June 29, which approves the direct concession to the autonomous communities and the cities of Ceuta and Melilla of aid for the execution of various incentive programs linked to self-consumption with aid in the installation of up to 45%. Consult with our advisers for more information.

For more information, consult our Particular Conditions of Self-consumption [Specific conditions of self-consumption](#).

\*Budget based on the data provided and on estimates for the simulation. Indicative price, includes installation and start-up. For financed payments, Compañía Lumisa Energías, S.L., through Banco Bilbao Vizcaya Argentaria, S.A. facilitates the payment of the installation of solar panels in up to 84 months. Financing subject to prior approval by Banco Bilbao Vizcaya Argentaria, S.A.
